### *Note:*

- <sup>(1)</sup> The Group has adopted the methodology as stated in Clean Development Mechanism of the United Nations Framework Convention on Climate Change (UNFCCC) to calculate and offset greenhouse gas emissions from operating projects. The greenhouse gas emission calculation methodologies account for the carbon dioxide equivalent emitted from fossil fuels used for electricity generation and emissions from the combustion of MSW, and methane released from the wastewater treatment process.

## **CHAIRLADY'S STATEMENT**

TO ALL HONORABLE SHAREHOLDERS,

On behalf of Canvest Environmental Protection Group Company Limited, I am pleased to report the satisfactory results of the Group for the six months ended 30 June 2022 (the "Period").

In the first half of 2022, the international market environment became increasingly complicated while pandemic conditions resurged and scattered across the PRC, which brought a greater downward pressure on the PRC's economic development. As the PRC government saw results from the coordination of pandemic control and macroeconomic policies adjustments, pandemic conditions were contained effectively, followed by the orderly resumption of work and production among enterprises. As a result, the economic conditions stabilized and recovered. Despite the complex macroeconomic challenges, the PRC government remains committed to the targets of achieving "carbon peaking" and promoting "carbon neutrality".

In order to promote low-carbon transition of the energy sector and accelerate the expansion of new energy and renewable energy, the PRC government has promulgated a series of favorable policies to support the development of the WTE industry, fostering favorable conditions for the Group's development. The relevant industrial policies optimize policies and measures targeting on high-quality development of new energy in the new era, construction of modern energy system, renewable energy development and construction of "Zero-waste City". They not only aim at sustaining and increasing energy supply through new energy, but also consolidating a solid foundation for achievement of carbon peaking and carbon neutrality. The relevant policies have specified targets and key development directions for a zero-carbon lifestyle, and promoted the green transition of social development. As such, the WTE industry will enjoy ample room for market development.

Despite the challenges of diminishing project construction size in the industry, market penetration to lower-tier cities as well as the projects were changed from quantity to quality, the Group, as a leading integrated urban environmental protection and sanitation solution provider that engages in the WTE business and provides intelligent urban environmental hygiene and related services, was committed to improving its operating performance and project construction management by capitalizing on refined management and vigorous innovation. Various new projects continued to proceed as scheduled, with a stellar performance delivered despite pandemic conditions.

## **FINANCIAL PERFORMANCE**

In the first half of 2022, the Group's revenue increased by 52.5% year-on-year to HK\$4,111.5 million, and the profit attributable to equity holders of the Company increased by 25.6% year-on-year to HK\$774.0 million. The increase in total revenue was mainly contributed by the increase in revenue from power sales and waste treatment fees from newly operating plants and revenue from project construction from the additional projects.

After taking into consideration of the Group's development plan and investment returns to our Shareholders, the Board has resolved to declare an interim dividend of HK6.2 cents per Share for the six months ended 30 June 2022 (corresponding period in 2021: HK5.0 cents).

## BUSINESS REVIEW

The volatile pandemic condition in the PRC in the first half of the year led to a series of challenges such as tight schedules of project construction progress, geographical constraints and delays in equipment supply in certain regions. Operation and construction of various projects of the Group experienced certain impact, including the commencement of operation of new projects. However, as all staffs and project construction entities paid concerted efforts to overcome difficulties, the overall operating performance still met expectation.

As at the date of this announcement, the Group had secured 37 WTE projects with a total daily MSW processing capacity of 55,540 tonnes, of which phase 1 of Linfen WTE project was put into operation during the Period. A total of 28 projects of the Group have been in operation with a daily MSW processing capacity of 36,040 tonnes, ensuring a stable operating cash inflow. In the first half of 2022, the Group also secured concession rights pertaining to Huidong WTE project and Quyang WTE project thereby consolidating our regional advantages in Guangdong Province and Hebei Province, while further expanding our business deployment across the PRC market. Besides, in recognizing the importance of project construction quality, the Group consistently maintains high-standard requirements for refined operation and management. For instance, Dianbai WTE project has been awarded “Grade AAA Innocuous Waste Incineration Plant”, the highest ranking in the grading system.

Canvest continues to promote its strategic transformation by focusing on the WTE business, while strategically developing upstream and downstream asset light businesses with growth potential, including environmental sanitation and related services. During the Period, the Group won the bids for waste collection and transportation contracts in Laishui County and Quyang County in Hebei Province. Our WTE business avoids secondary pollution, reduces waste volume and generates green energy during MSW processing. With our WTE plants established as outposts, we have successfully expanded to the environmental sanitation and related services, representing an important breakthrough in the “Incineration +” model, and reinforcing the industry chain integration of the WTE business with the environmental sanitation. As a result, our regional presence has been further strengthened. In the first half of 2022, the Group innocuously treated 6,829,404 tonnes of waste, generated 2,579,150,000 kWh of green energy, offset carbon dioxide equivalent emissions by 5,043,000 tonnes and saved 658,000 tonnes of standard coal.

Meanwhile, we also actively expanded a series of diversified and integrated smart city management services, research and development on green technology and smart technology to city management. The smart car parking management business continued its stable expansion, with approximately 18,000 parking spaces under management in Dongguan City, Hebei Province, Anhui Province, Hunan Province and Chongqing Municipality during the Period. The number of parking spaces under management increased by more than 25% compared with the end of last year. Looking ahead, the Group will explore more relevant development opportunities, with the ultimate target to expand the digital technology business to the city-wide management services, as well as to expand the whole industry chain business to more regions in China.

In addition, the Group proactively pressed ahead with economic development premised on harmonious coexistence with the natural environment. In January this year, the Strategy and Sustainability Committee was established to identify certain sustainability targets that are most relevant to business and sustainability strategies, which will be incorporated into our business strategy to unite, strengthen and enhance the Group's overall strategic, environmental, social and corporate governance efforts.

Canvest, as always, commits to fulfil its social responsibilities and proactively undertook the social responsibility of environmental publicity and education by enhancing the understanding of the waste incineration process among the public, during the Period, our China Scivest project was selected by the Department of Ecology and Environment of Guangdong Province as "Top 10 Guangdong Province Advanced Entities with Open Environmental Facilities" (廣東省十佳環保設施開放先進單位). In addition, Environmental Protection Education Centre in our Lufeng project and Dianbai project were awarded as "2021 Environmental Education Centre of Guangdong Province" by the Department of Ecology and Environment of Guangdong Province. It demonstrates Canvest's effort in environmental education was recognised by the professionals and general public. Furthermore, the Group donated HK\$1 million to the charity fund in Hong Kong to purchase anti-epidemic kits for the grassroots families.

Canvest has been recognized for its good corporate governance and has won numerous awards during the Period. The Group was granted the "Honored Company — Power (Electric, Gas, Water)" in the "2022 All-Asia Executive Team" rankings by Institutional Investor, a prestigious international financial magazine, and within the Small & Midcap and Mainland China categories, it was awarded the top "Best CEO" and "Best CFO" rankings while being awarded in "Best Investor Relations Program" and "Best ESG". Furthermore, the Group was awarded the "Guangdong-Hong Kong-Macao Bay Area Environmental Leadership Recognition Award" in the "BOCHK Corporate Environmental Leadership Awards 2021", as well as the "Best Investor Relations Listed Company" in the "2021 Futubull Annual Review (2021牛牛圈年度盤點)" organized by Futu Securities International (Hong Kong) Limited.

## **OUTLOOK**

In the first half of 2022, factors such as the volatile COVID-19 conditions, complicated international environment led to uncertainties over macroeconomic environment. Being committed to serving the grid and local government entities, the impact on the Group's operating revenue was limited. With COVID-19 conditions alleviating in the PRC, further relaxation of pandemic measures is anticipated. The Group will continue to weather the challenges and strive to complete projects as scheduled for production and operation, thus achieving the expected targets. On the other hand, the COVID-19 pandemic has not hindered the government's efforts to achieve the "Carbon Peaking" and "Carbon Neutrality" targets. In light of the ongoing introduction of policies related to energy conservation, carbon reduction and energy development by local governments, as well as successive announcements of medium-term and long-term special plans for municipal WTE projects that further clarified local deployments, we believe a far-reaching revolution of society and economy will be facilitated.

As the industry shifted to a mature phase and confronted with slower growth, the Group will work together with all employees as a whole with precise positioning and clear objectives, so as to overcome uncertainties and challenges, implement strategic transformation, as well as to improve operational quality and efficiency. We will vigorously implement our technology-led, digital-enabled and ecology-focused initiatives to consolidate our carbon reduction measures as an active response to the government's dual carbon targets.

Being one of the major WTE enterprises in China, Canvest will continue with refined management in its major business operations and further develop its WTE business among challenges and opportunities. As the industry enters a mature stage, the Group will facilitate internal management efficiency on top of the elevation of operational efficiency and quality, including increasing investments in research and development and promoting production process upgrades to increase efficiency at lower costs. We will continue to accelerate our innovation and transformation with WTE business at core, and strengthen the expansion and extension of our business to the upstream and downstream industry chain, thus engaging in other related industries such as environmental sanitation, waste transportation and collection, as well as industrial solid waste processing. The Group will continue to expand in a wide range of integrated smart city management services to drive the development of its asset light business, which will promote healthy and high-quality development of the Group with more revenue.

On behalf of the Board, I hereby express our sincere gratitude to our Shareholders, business partners and stakeholders for their continued and unfailing support and to our staff members for their dedication and hard work during the pandemic. With an aim to adhere to its mission "to protect the blue sky and clean water, and build a beautiful home", Canvest is committed to its corporate philosophy to "unite as one, work meticulously, and strive for excellence" and will develop and optimize its response to the changes in the pandemic by closely monitoring the pandemic situation, in order to achieve sustainable growth and bring greater values for all of our stakeholders.

## NOTES:

### 1 BASIS OF PREPARATION

This condensed consolidated interim financial information for the six months ended 30 June 2022 has been prepared in accordance with Hong Kong Accounting Standard (“HKAS”) 34 “Interim Financial Reporting” issued by the Hong Kong Institute of Certified Public Accountants (“HKICPA”). This condensed consolidated interim financial information does not include all the notes of the type normally included in annual consolidated financial statements. Accordingly, it should be read in conjunction with the annual consolidated financial statements for the year ended 31 December 2021, which have been prepared in accordance with Hong Kong Financial Reporting Standards (“HKFRSs”).

#### Significant events and transactions

##### *(a) Award of concession rights*

- In March 2022, the Group was conditionally awarded the waste-to-energy (“WTE”) project located in Quyang County, Hebei Province. The total daily municipal solid waste (“MSW”) processing capacity of this WTE plant is 1,050 tonnes. It shall be constructed in two phases, of which the processing capacity of phase 1 shall be 700 tonnes and phase 2 shall be 350 tonnes.
- In June 2022, the Group was conditionally awarded the WTE project located in Huidong County, Guangdong Province. The total daily MSW processing capacity of this WTE plant is 1,500 tonnes.

##### *(b) Acquisition of non-controlling interest*

On 23 February 2022, the Group acquired 29.56% equity interests of Zaozhuang Zhongke Environmental Energy Company Limited (“Zaozhuang Zhongke”) by public auction with a total consideration of RMB15,379,000 (equivalent to HK\$18,962,000). Upon the completion of the acquisition, the Group owns 80.56% equity interests in Zaozhuang Zhongke.

##### *(c) Prevention and control measures against COVID-19*

After the outbreak of COVID-19 in early 2020, a series of precautionary and control measures have been and continued to be implemented across the People’s Republic of China (“PRC”). In the meantime, the Group has implemented precautionary and control measures in all projects to fight against this disease and safeguard its employees and business operations. The Group will pay close attention to the development of this disease and evaluate its impact on the financial position and operating results of the Group. As at the date of this announcement, the Group was not aware of any material adverse effects on the condensed consolidated interim financial information as a result of this disease.

### 2 ACCOUNTING POLICIES

The accounting policies applied are consistent with those of the annual consolidated financial statements for the year ended 31 December 2021, as described in those annual consolidated financial statements, except for the estimation of income tax and the adoption of new and amended standards as set out below.

#### Estimation of income tax

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

(a) **New and amended standards adopted by the Group**

A number of amended standards became applicable for the current reporting period:

Amendments to HKAS 16	Property, Plant and Equipment: Proceeds before intended use
Amendments to HKFRS 3	Reference to the Conceptual Framework
Amendments to HKAS 37	Onerous Contracts — Cost of Fulfilling a Contract
Amendments to Annual Improvements Project	Annual Improvements to HKFRS Standards 2018–2020 Cycle

The amended standards listed above did not have any impact on the amounts recognised in prior periods and are not expected to significantly affect the current or future periods.

**3 REVENUE AND SEGMENT INFORMATION**

The chief operating decision-maker has been identified as the executive Directors of the Group. The executive Directors review the Group's internal reporting in order to assess performance and allocate resources. For the six months ended 30 June 2022, the executive Directors consider that the Group's operations are generally operated and managed as a single segment — WTE project construction and operation (2021: same). No separate segment information was presented accordingly.

The Group is mainly domiciled in the PRC. All of the Group's revenue is generated in the PRC and most of its non-current assets are located in the PRC for the six months ended 30 June 2022 (2021: same).

## 9 EARNINGS PER SHARE

### (a) Basic

The calculation of basic earnings per share is based on the Group's profit attributable to equity holders of the Company and weighted average number of ordinary shares in issue, excluding treasury shares and shares held under Share Award Scheme, during the period.

	Six months ended 30 June	
	2022	2021
	(Unaudited)	(Unaudited)
Profit attributable to equity holders of the Company ( <i>HK\$'000</i> )	<u>774,002</u>	<u>616,091</u>
Weighted average number of ordinary shares in issue ( <i>thousand shares</i> )	<u>2,429,441</u>	<u>2,429,441</u>
Basic earnings per share ( <i>HK cents</i> )	<u><u>31.9</u></u>	<u><u>25.4</u></u>

### (b) Diluted

Diluted earnings per share is calculated by adjusting the weighted average number of ordinary shares outstanding to assume conversion of all dilutive potential ordinary shares.

The Company has one category of dilutive potential ordinary share: share options (2021: same). For the share options, a calculation was performed to determine the number of shares that could have been acquired at fair value (determined as the average market price of the Company's shares for the period) based on the monetary value of the subscription rights attached to the outstanding share options. The number of shares calculated as above is compared with the number of shares that would have been issued assuming the exercise of the share options.

Diluted earnings per share for the six months ended 30 June 2022 and 2021 are the same as the basic earnings per share as the conversion of potential ordinary shares in relation to the outstanding share options would have an anti-dilutive effect on the basic earnings per share.

## 10 DIVIDENDS

The Board has resolved to declare an interim dividend of HK6.2 cents per ordinary share for the six months ended 30 June 2022 (six months ended 30 June 2021: HK5.0 cents per ordinary share), which will be payable on or about Monday, 31 October 2022 to shareholders whose names appear on the register of members of the Company on Friday, 16 September 2022. The interim dividend, amounting to HK\$151,252,000 (six months ended 30 June 2021: HK\$121,977,000), has not been recognised as a dividend payable in the condensed consolidated interim financial information. The amount of interim dividend declared for the six months ended 30 June 2022 was calculated based on the number of ordinary shares in issue at the date of this announcement (i.e. 23 August 2022).

The final dividend of HK5.8 cents per ordinary share for the year ended 31 December 2021 (for the year ended 31 December 2020: HK4.9 cents per ordinary share) has been approved by the shareholders at the annual general meeting of the Company held on Friday, 17 June 2022, and was subsequently paid on Friday, 22 July 2022. The final dividends for the year ended 31 December 2021, amounting to HK\$141,493,000, have been recognised as dividends payable as at 30 June 2022.

	<u>2,372,494</u>	<u>1,975,749</u>
	<u><b>3,827,055</b></u>	<u><b>3,605,386</b></u>

*Note:* As at 30 June 2022, included in “Trade receivables” are receivables of HK\$8,647,000 (31 December 2021: nil) due from the subsidiary of the Group’s associate, which are unsecured, interest-free and repayable on the twenty-fifth of next month according to the credit term, and receivables of HK\$755,000 (31 December 2021: nil) due from the Group’s related party, which are unsecured, interest-free and repayable upon the receipt of the VAT invoices.

An impairment analysis is performed at each reporting date using the probability of default approach to measure expected credit losses. As the Group’s customers are primarily PRC local governments and state-owned entities, the probabilities of default rates are estimated based on comparable companies with published credit ratings. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forward-looking credit risk information. The Group has identified the gross domestic product growth rates in the PRC to be the most relevant factors, and accordingly adjusted the historical loss rates based on the expected changes in these factors in the future period.

For trade and bills receivables which are long overdue with significant balances, they are assessed individually for impairment allowance. The loss allowance was assessed to be HK\$8,933,000 as at 30 June 2022 (31 December 2021: HK\$5,933,000).

The credit period granted by the Group is generally 30 days. The maturity of the bills receivable is within 12 months. The ageing analysis of trade receivables, net of impairment, as at the end of the reporting period, based on invoice date, is as follows:

	<b>As at 30 June 2022 (Unaudited) HK\$'000</b>	<b>As at 31 December 2021 (Audited) HK\$'000</b>
Up to 1 month	<b>957,512</b>	763,596
1 to 3 months	<b>201,075</b>	103,342
3 to 6 months	<b>133,332</b>	88,074
Over 6 months	<b>151,818</b>	105,924
	<b><u>1,443,737</u></b>	<b><u>1,060,936</u></b>

As at 30 June 2022, other receivables mainly include a sum of HK\$135,186,000 (31 December 2021: HK\$135,908,000) which is agreed to be reimbursed by an entity ultimately controlled by the local municipal government in related to interests in certain PRC companies. The remaining balances mainly include refundable tender deposits for potential projects (31 December 2021: same).

If there is no significant increase in credit risk since initial recognition, impairment on other receivables is measured at 12-month expected credit losses. If a significant increase in credit risk has occurred, then impairment is measured as lifetime expected credit losses. As at 30 June 2022, the impairment was assessed to be HK\$18,000,000 in respect of other receivables (31 December 2021: HK\$18,000,000).

## MANAGEMENT DISCUSSION AND ANALYSIS

During the period under review, China's economy saw increased operational pressure and faced various risks and challenges due to various factors such as the complicated and severe international environment, the sporadic and frequent outbreak of the pandemic in multiple cities across the country, and high temperature and frequent rain in the southern region of China.

In the midst of the arduous campaigns to pursue reform, development and stability policies in the PRC under the complicated and challenging international environment, the PRC government has put forward the requirements for preventing the pandemic, stabilizing the economy and ensuring safe development. However, prices of raw materials saw a sharp rise as the personnel control and the transportation of building materials and environmental protection materials were constantly affected by ongoing resurgent pandemic conditions in various areas across the PRC. Despite the above, the PRC government remains committed to the targets of achieving "carbon peaking" and promoting "carbon neutrality". During the period under review, the PRC government issued the Guiding Opinion on Accelerating the Promotion of Construction of Urban Environmental Infrastructures (《關於加快推進城鎮環境基礎設施建設的指導意見》) and the Implementation Plan for Synergistic Efficiency of Pollution Reduction and Carbon Reduction (《減污降碳協同增效實施方案》), to comprehensively promote the planning and layout of urban environmental infrastructure, encourage the construction and resource utilization of "multi-in-one" comprehensive disposal bases, and promote the intelligent green upgrading. Also, the establishment of renewable energy settlement companies has been considered so that the power grid companies can take the lead in financing the renewable energy subsidies.

However, in the new context of the normalized pandemic, industry entered into maturity stage, and enterprises have embraced the era of efficiency improvement and low carbon emissions. In view of the above, the Group focused on improving efficiency by implementing delicacy management, optimizing the business process, implementing digital management, and adopting real-time dynamic control. Furthermore, the talent management and training was strengthened to promote strategic transformation and increase revenue at lower expenses. In addition, the Group has continued to enhance the internal control and standardized management of its various project companies, which will promote the implementation of system, enhance the level of standardized management of safety and environmental protection, and continue to minimize safety and environmental risks.

During the period under review and up to the date of this announcement, there were no ongoing cases of infection identified among all staff and construction teams, while other related businesses proceeded orderly. The Group will closely monitor and assess the pandemic impacts, with more proactive measures to be taken in due course. As at the date of this announcement, the Group is not aware of any material adverse impact on the condensed consolidated interim financial information as a result of the pandemic.

Leveraging on our market leadership in WTE plants and environmental hygiene and related services, the Group will continue to expand into other integrated smart city management services.

In addition, to further enhance the Company's corporate governance and fulfill its social responsibility, in January 2022, the Group established the Strategy and Sustainability Committee, chaired by an executive Director, to demonstrate the importance of the Group's commitment to sustainable development.

## OVERALL PERFORMANCE

For the six months ended 30 June 2022, the Group's revenue was HK\$4,111.5 million (corresponding period in 2021: HK\$2,695.2 million). Revenue from power sales and waste treatment was HK\$1,768.4 million (corresponding period in 2021: HK\$1,358.0 million). The operating profit was HK\$1,083.9 million (corresponding period in 2021: HK\$880.5 million). Profit attributable to equity holders of the Company was HK\$774.0 million (corresponding period in 2021: HK\$616.1 million), representing an increase of 25.6%. Basic earnings per share was HK31.9 cents (corresponding period in 2021: HK25.4 cents).

During the period under review, the Group's implementation of innocuous treatment of waste volume amounted to 6,829,404 tonnes. The Group generated 2,579,150,000 kWh from green energy, saved 658,000 tonnes of standard coal and offset 5,043,000 tonnes of carbon dioxide equivalent emissions.

### ***Southern China Region***

During the period under review, 15 WTE plants located in Guangdong Province continued to provide contributions. Huizhou WTE plant is in the planning stage.

In June 2022, the Group was conditionally awarded the WTE project located in Huidong County, Guangdong Province. The total daily MSW processing capacity of this WTE project shall be 1,500 tonnes. The project is currently in the planning stage.

4 WTE plants located in Guizhou Province and Guangxi Zhuang Autonomous Region continued to provide contributions during the period under review.

### ***Western China Region***

3 WTE plants located in Sichuan Province and Yunnan Province continued to provide contributions during the period under review.

The Group holds 30% equity interests of Sichuan SIIC. On 3 August 2022, Sichuan SIIC completed the acquisition of all equity interests in Dazhou Jiajing, which holds a WTE plant, with the total daily MSW processing capacity of 2,000 tonnes, and is under construction.

### ***Eastern China Region***

1 WTE plant located in Shandong Province and 1 WTE plant located in Jiangsu Province continued to provide contributions during the period under review. Baoshan WTE Project and Taizhou WTE project are currently under construction. Shen County WTE project is in the planning stage.

### ***Northern China and Northeast China Regions***

1 WTE plant located in Hebei Province and 1 WTE plant located in Liaoning Province continued to provide contributions during the period under review. Phase 1 of Linfen WTE plant commenced trial operation in 2022. With the change of the economic factors, Hunyuan WTE project is terminated after the negotiation with the local government. Yi County WTE project is under planning.

In March 2022, the Group was conditionally awarded the WTE project located in Quyang County, Baoding City, Hebei Province. The total daily MSW processing capacity of this WTE project shall be 1,050 tonnes. The project is currently in the planning stage.

### ***Central China Region***

1 WTE plant located in Jiangxi Province continued to provide contributions during the period under review. Changning WTE project is under planning.

## **II. Environmental Hygiene and Related Services**

During the period under review, Dongguan Xindongyue processed 84,320 tonnes of solidified fly ash and continued to provide contributions to the Group.

Zhongzhou Environmental, which is principally engaged in the treatment of bottom ash created from the incineration of waste in the PRC, continued to provide contributions to the Group.

Sichuan Jiajieyuan, a renowned environmental hygiene and related services player in the PRC, continued to provide stable contributions during the period under review. Xinyi and Laibin waste collection and transportation projects continued to provide contributions to the Group. In 2022, environmental hygiene business expanded into Hebei Province and were awarded waste collection and transportation projects in Laishui County and Quyang County.

Johnson, a leading environmental hygiene service provider providing a wide range of environmental services in Hong Kong, continued to provide contributions to the Group during the period under review.

## **III. Management and Operation of Smart Car Parking Business**

Leveraging on our market leading position in the WTE and environmental hygiene and services industry, the Group continued to develop its integrated smart city management services, such as smart car parking solutions.

During the period under review, the Group provided smart car parking solutions for over 18,000 parking spaces, covering Guangdong Province, Hebei Province, Chongqing Municipality, Anhui Province and Hunan Province.

## ANALYSIS OF FINANCIAL RESULTS

### Revenue

During the period under review, the Group's revenue reached HK\$4,111.5 million, representing an increase of 52.5% when compared with HK\$2,695.2 million in 2021. Among that, revenue from power sales and waste treatment fees for the period under review reached HK\$1,768.4 million, representing an increase of 30.2% from the corresponding period in 2021. The increase in total revenue was mainly contributed by the increase in revenue from power sales and waste treatment fees from newly operating plants and the revenue from project construction services from the additional projects.

The following table sets forth the breakdown of revenue for the six months ended 30 June 2022 and 2021:

	Six months ended 30 June			
	2022		2021

## Cost of Sales

Cost of sales primarily consists of maintenance cost, depreciation and amortisation, employee and related benefit expenses, environmental protection expenses and construction cost.

During the period under review, cost of sales increased by 65.9% from HK\$1,726.3 million in 2021 to HK\$2,864.2 million in 2022. The increase was mainly attributable to the operating costs of new WTE plants that have commenced operation and increase in construction cost for project construction services.

## Gross Profit and Gross Profit Margin

During the period under review, gross profit of the Group amounted to HK\$1,247.3 million, representing an increase of 28.7% as compared to HK\$969.0 million in 2021. The increase in gross profit was mainly attributable to the increase in processing capacity in operation.

The following table sets forth the breakdown of the Group's gross profit by nature for the six months ended 30 June 2022 and 2021:

	Six months ended 30 June			
	2022		2021	
	HK\$'000	%	HK\$'000	%
Power sales and waste treatment operations	812,252	65.1%	697,429	72.0%
Project construction services	321,189	25.8%	199,205	20.6%
Finance income from service concession arrangements	86,329	6.9%	57,861	5.9%
