VOLUNTARY ANNOUNCEMENT
LAUNCHING OF 5G NEW PRODUCTS

This announcement is made voluntarily by the board of directors (the “**Board**”) of AsiaInfo Technologies Limited (the “**Company**” or “**AsiaInfo**”), to inform the shareholders and potential investors of the Company about the latest business development of the Company.

The Board is pleased to announce that the Company successfully held the product launching conference of “Force Evolution – AsiaInfo X for 5G” in Beijing on June 20, 2019. The key products of the 5G series were released at the conference, which have comprehensively demonstrated the 5G network and business support capability of “global domain virtualization, global domain intelligentization and perceptible global domain” created by AsiaInfo.

“Global domain virtualization” refers to the products and solutions of AsiaInfo for 5G network intelligence and virtualization, assisting the operators to realize the automation and virtualization of network and business functions within the network system. “Global domain intelligentization” refers to the ability of AsiaInfo to assist the operators in establishing a set of universal compatible artificial intelligence platform, and the ability to assist the operators in unifying the outputs of each vertical ecosystem within the communication ecosystem, with the help of its ability of machine learning, data mining and artificial intelligence within the operator system accumulated for years. “Perceptible global domain” refers to all new products developed by AsiaInfo for 5G technology will aim at optimizing and improving the perception and experience of the mobile users and vertical industry users of the operators at the network business level. The ultimate goal of all products is to optimize the experience and perception of 5G users.

The issuance of 5G commercial licenses marks China’s official entry into the 5G commercial era, which presents immense business opportunity and challenge for AsiaInfo. Since 2018, the Company has started the planning and preliminary research of a new operation support system for 5G business model and scenario, and achieved breakthrough in the aspects of 5G intelligent network, artificial intelligence, platform support, big data and scenario charge. With its 26 years of extensive experience and technology strengths in the telecommunications industry, AsiaInfo will continue to deepen its cooperation with telecommunications operators and large-scale enterprises in the future by virtue of its leading 5G network and business support capability. It strives to join hands with partners to establish an open and synergistic 5G ecology and realize the 5G context “from traffic to value”.

By order of the Board
AsiaInfo Technologies Limited
