PRINCIPAL TERMS OF THE FUND

Fund	The Climate Impact Asia Fund

Environmental Consultant	World Wide Fund for Nature — Hong Kong
Investment Objective	The primary investment objective of the Fund is to achieve sustainable long-term returns together with a positive impact against climate change.

Investment Policies

The Investment Manager seeks to achieve the objective of the Fund by investing primarily in companies in Asia (principally China, Hong Kong, Taiwan, India, South Korea, Thailand, Malaysia, Indonesia, Vietnam, Singapore, the Philippines, Japan), Australia and New Zealand with exposure to the low carbon environmental goods and services sector.

The Investment Manager may invest in a diversified portfolio of listed equities (including common and preferred stock), access products (such as participatory notes, swaps, contracts for differences), debt securities, stock warrants, index futures, and/or cash and cash equivalents.

The equities in which the Fund will invest will include equities listed on stock exchanges in the Asia Pacific region, as well as equities of companies which have operations in, exposure to, or derive a substantial part of their revenue or earnings from the Asia Pacific region, wherever they may be listed.

In selecting investments, the Investment Manager will seek to gain exposure to companies operating in sectors including (but not limited to) renewable energy, alternative energy, water, environmental services, green finance, low-carbon transport, energy management services, and green consumer staples. Such companies must derive at least 50% of their revenues or earnings (either at, or projected within three years from, the date of the investment) from the low carbon environmental goods and services sector, and which contribute a favourable impact to the climate, as determined by the Investment Manager. With a focus on the low carbon environmental goods and services sector, the Fund will aim to mitigate or reduce the effects of climate change and pollution as the world transitions towards a low carbon economy.

While the Fund will seek to achieve its investment objective by investing primarily in a long portfolio of equity securities, the Fund may also invest from time to time in (i) futures to short equity indices; (ii) forward currency exchange contracts; and (iii) option contracts (on equities and equity indices) as part of its portfolio management and hedging strategy.
